

Privacy Policy

Response Technologies (RTL) provides the Centurion Anywhere app as a commercial app that connects to a Firebase cloud server. This SERVICE is provided by RTL at no cost and is intended for use as is.

This page is used to inform website visitors regarding our policies with the collection, use, and disclosure of Personal Information if anyone decided to use our Service.

Information Collection and Use

Centurion Anywhere has the ability to collect the users phone number but it's only for sending notifications through Centurion Anywhere to a server that the user specifies.

Non-personal information also passes through Centurion Anywhere including the device information (e.g. MAC address, label, firmware version, etc.) and anonymous information that is used to connect the user to the SERVICE. Additional information is passed through Centurion Anywhere when the user activates an emergency on the device including the time at which it was activated and location data (e.g. latitude, longitude, altitude, velocity, and direction). As with all data, the emergency data is sent through the SERVICE to a server that the user has specified.

We do not use the information for any purpose nor do we disclose your information to any other party.

Log Data

We do not log data and information on your phone other than temporary application health data that is removed after it is sent.

Changes to This Privacy Policy

We may update our Privacy Policy from time to time. Thus, you are advised to review this page periodically for any changes. We will notify you of any changes by posting the new Privacy Policy on this page. These changes are effective immediately, after they are posted on this page.
